

CNC ENGRAVING ROLL MACHINE

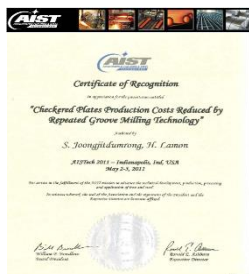

เครื่องกัดร่องลูกรีดอัตโนมัติ

CNC Engraving Roll Machine:

Machine for making a roller for checkered strip mills in steel industry. In the past, most steel industries in Thailand make order a roller from abroad. WCE is the first company in THAILAND that has created a designed and develop the first CNC engraving machine and successfully.

International exhibitions

AISTech 2011 Iron & Steel Technology Conference and Exposition in Indiana Convention Center, Indianapolis USA.

Award

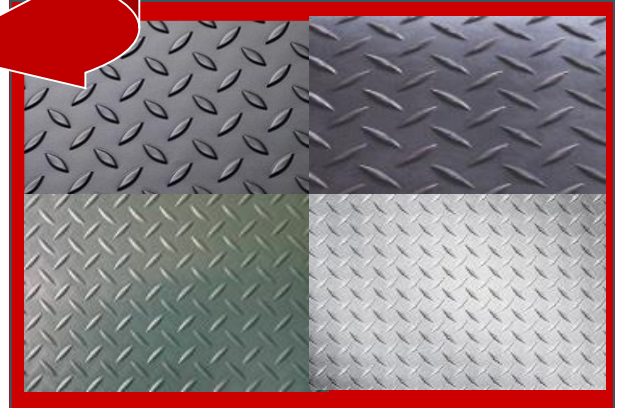

Thailand Invention Award 2012 Organize by NRCT.

CNC Engraving roll machine helps you saving :

- The repeated groove milling technique enables to extend the life time of a checkered work roll.
- The production per work roll can be increased.
- The production direct costs of a CK are reduced > 40 %.
- Indirect costs can be reduced by more than 15% and the work roll stock can be reduced to 1/5 (ASIAN zone)
- These significant cost reductions can be achieved without any negative impact on the product quality.
